KRISHNA SINGH

Databuzz Pvt. Ltd. – Data Scientist | Generative AI | Data Science | Artificial Intelligence | Machine Learning

krishna2999singh@gmail.com I +91 6281167354

PROFESSIONAL SUMMARY

I am a Data Scientist & GenAI Engineer with nearly 2 years of experience in building and deploying AI/ML and Generative AI solutions on AWS and Azure. Skilled in machine learning, deep learning, LLM integration, and scalable API development Seeking to contribute technical skills to drive business outcomes while continuing to grow in advanced AI and data science practices.

EXPERIENCE

Databuzz Pvt. Ltd.
May 2024 – Present

- Built and deployed AI/ML and Generative AI solutions on AWS and Azure to solve core business problems.
- Developed production-grade models using supervised, unsupervised, and deep learning techniques.
- Implemented LLM-based systems (GPT, Llama, Mixtral, Cohere, Phi) with RAG pipelines, prompt engineering, and agent orchestration.
- Designed scalable, secure cloud-native APIs and platform services using Python and .NET.
- Applied ML algorithms including Random Forest, XGBoost, KNN, Neural Networks, Linear & Lasso Regression, and K-Means.
- Authored well-documented public APIs and SDKs, managing their entire lifecycle from design to deployment.
- Contributed to agile workflows through design reviews, code reviews, and architectural discussions.

PROJECTS

1. COMPEXTRACT Tool – AI-Powered Electronic Component Data Extraction
Domain: Electronics

- Designed a multi-model AI pipeline integrating AWS Bedrock to process both text and image-based inputs through structured APIs.
- Implemented OCR, table detection, and LLM-based analysis for automated extraction of electronic component data from PDFs.
- Used Claude Sonnet 4 and Claude 3.7 Sonnet with intelligent model orchestration to optimize performance and cost.
- Built component-specific AI extractors for capacitors, diodes, and resistors.
- Deployed enterprise-grade solution with AWS IAM security, session token handling, and PyInstaller-based executable packaging.

2. Real-Time Credit Card Fraud Detection System
Domain: Banking / Financial Services

- Built and trained deep learning models to detect fraudulent credit card transactions using high-volume historical data.
- Performed extensive preprocessing, sequence modeling, and class imbalance handling using SMOTE.

- Implemented LSTM, Autoencoders, and Random Forest models for fraud classification and anomaly detection.
- Visualized fraud patterns and feature correlations using Matplotlib and Tableau.
- Enabled real-time fraud detection to reduce financial losses while minimizing false positives.
- **Tech Stack:** Python, SQL, TensorFlow (Keras), Pandas, NumPy, Scikit-learn, Imbalanced-learn

3. Consumer Complaint Classification System (SVM)
Domain: Banking
- Developed an API-based system to classify consumer complaints into relevant banking departments.
- Trained models on a dataset of 2+ million records spanning over 5 years of historical data.
- Built a web application that accepts complaint text and predicts the appropriate department category.
- Improved complaint routing efficiency and response time for customer service teams.

4. Automated E-Commerce Product Classification System
- *Domain: Retail / E-Commerce*
- Developed an end-to-end Computer Vision pipeline to classify product images into inventory categories.
- Applied Transfer Learning using MobileNetV2 for high accuracy with computational efficiency.
- Implemented image augmentation techniques (zoom, shear, flips) to improve model generalization.
- Performed EDA, confusion matrix analysis, and classification reports to evaluate performance.
- Automated product tagging to reduce manual effort and improve time-to-market.
- **Tech Stack:** TensorFlow (Keras), CNN, MobileNetV2, Python, Pandas, NumPy, Scikit-learn

SKILLS

Technical Skills:
Python, SQL, NumPy, Pandas, Scikit-learn, TensorFlow (Keras), Machine Learning, Deep Learning, LSTM, CNN, XGBoost, SMOTE, Transfer Learning (MobileNetV2), OpenAI, LangChain, LLMs (GPT, Llama, Mixtral, Cohere, Phi), Prompt Engineering, RAG, Agent Orchestration, AWS Bedrock, AWS SageMaker, Azure, API Development, IAM Security, PyInstaller, Tableau, Matplotlib, Seaborn, MS Excel, PowerPoint, OCR & PDF Processing Pipelines

Core Competencies:
Data Science & Analytics, Machine Learning & AI Solutions, Deep Learning, Model Interpretation, Data Visualization, Cloud-Based AI Systems, Data-Driven Decision Making

Soft Skills:
Critical Thinking, Communication, Collaboration, Adaptability, Problem Solving, Time Management

EDUCATION

M.Sc. in Data Science
GITAM University, Visakhapatnam | 2022 – 2024
Bachelor of Computer Applications (BCA)
GITAM University, Visakhapatnam | 2018 – 2021

LANGUAGES

English | Hindi | Telugu (Beginner)
